Game Mechanics

Core Gameplay

The player automatically jumps when landing on platforms

The objective is to climb as high as possible without falling

Score increases based on height reached

The game ends if the player falls below the bottom of the screen

Platform & Jetpack Mechanics

Regular platforms are stationary

Moving platforms appear after reaching 500 points

Platforms become strategically positioned as you climb higher

Landing on platforms gives a velocity boost upward

Jetpack power-up: Appears every 500 points (after 400 points). Collect to temporarily turn into a jetpack character and get a short upward boost, crossing a few platforms. The jetpack effect ends automatically after a short duration.

Jets move down with the camera, just like platforms

What additional feature can be added to this game to make it stand out

To make your game stand out while maintaining its core vertical-jumping challenge, consider adding a **"Time Freeze Crystal"** power-up:

Feature: Time Freeze Crystal

Mechanic:
